

FULUO

JIAXING FULUO MEDICAL SUPPLIES CO., LTD

WWW.JXFULUO.COM

INTRODCTION

Jiaxing Fuluo Medical Supplies CO., LTD, the predecessors Jiaxing Fuluo Sporting Goods CO., LTD established in 2007 in Suzhou, and then moved to Gaoqiao Hi-tech Incubation Park in Tongxiang city in 2009.

With the development of the company and the expansion of different products, companybought land from government, built new facilities and introduced new equipments , established a new company named Jiaxing Fuluo Medical Supplies CO., LTD in 2017 . Now it locates in NO. 1989 Gaoqiao street, Gaoqiao Town, Tongxiang, Jiaxing city, Zhejiang Province.

The project covers an area of 10000 square meters, including 12000 square meters' factory area, 2700 square meters' office building area,500 square meters' purifying area. There are 2production lines of sporting tape,medical tape, wound dressing and so on.All the products meet the ISO13485: 2016 International Certification,

Fuluo provides customers with high quality OEM service. The product is mainly exported to Europe, North America, Japan and so on. Additionally, we have more than 30% Japanese market share for the kinesiology tape.

We have adequate human resources to offer a powerful manufacturability that can meet the local and abroad market demand.Now we undertake processing and import-export business from famous company home and abroad.The products quality is unanimously approved through the testing of customer-specified inspection body.

Institutional certification

A complete production line

Non-woven wound dressing

Non-woven wound dressing

Product advantages

- Highly conformable dressing is easy to apply, conforms to body contours, and flexes with movement or swelling.
- Dressing is porous and breathable for increased patient comfort, better exchange of moisture vapor and oxygen, and reduced risk of skin maceration.
- Unique, nonadherent pad won't stick to the wound, allowing normal wound healing processes to occur with less pain and trauma.
- Dressing provides excellent adhesion, yet is gentle to the skin.
- Convenient, all-in-one dressing reduces application time.
- Absorbent pad protects wound and absorbs drainage.
- Full range of sizes is available to fit every application.

Suggested Applications:

- Dressings for wound care.
- Post-surgical dressing.
- Gentle, for frequent dressing changes.
- Acute wounds such as abrasions and lacerations.
- Superficial and partial-thickness burns.
- I.V. catheter sites.
- Light to moderately draining wounds.
- To secure or cover devices.
- Secondary dressing applications.
- Over hydrogels, alginates and gauze.

Adhesive eyes plaster

Product advantages

- Highly conformable dressing is easy to apply, conforms to body contours, and flexes with movement or swelling.
- Dressing is porous and breathable for increased patient comfort, better exchange of moisture vapor and oxygen, and reduced risk of skin maceration.
- Unique, nonadherent pad won't stick to the wound, allowing normal wound healing processes to occur with less pain and trauma.
- Dressing provides excellent adhesion, yet is gentle to the skin.
- Convenient, all-in-one dressing reduces application time.
- Absorbent pad protects wound and absorbs drainage.
- Full range of sizes is available to fit every application.

Suggested Applications:

- Strabismic, weak sighted therapy .
- Nursing after ocular operation.
- Prevent eyes from infection.
- Use in treatment of eye injuries.

Transparent wound dressing

Product advantages

- Transparent, providing continuous observation of skin.
- Breathable, letting oxygen in and moisture vapor out, allowing the skin to function normally.
- Conforms to body contours and flexes with patient movement without stress on skin for improved patient comfort.
- Easy stretch and release removal.
- Waterproof, transparent film allows for effective oxygen-vapor exchange while helping protect against external contaminants, including those most commonly associated with catheter-related bloodstream infections.

Suggested Applications:

- All kinds of moderated and high exudated wounds
- Acute and chronic wounds hemorrhagic wounds.
- Difficult healing wounds.
- Lacuna, antrum wounds.
- Dermal ulcer.
- Surgical wound.
- Superficial wound.
- First and second degree burns.
- Lacerations and abrasions.

Polyurethane adhesive dressing

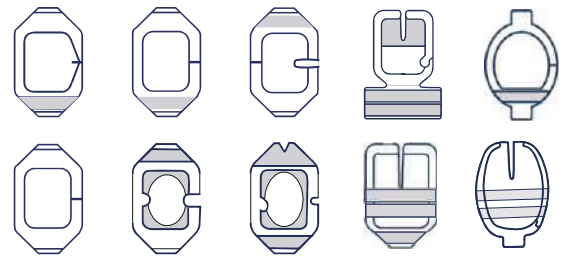

Product advantages

- Transparent dressings allow easy monitoring of wounds without the need to remove the dressing.
- Picture-frame delivery makes placement accurate and easy, minimizing potential to stick to gloves or to itself.
- Conformable: dressing flexes with skin for greater patient comfort.
- Provides a waterproof, sterile barrier to external contaminants including liquids, bacteria and viruses. In vitro testing shows that the transparent film provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.

Suggested Applications:

- Catheter sites. Clean, closed surgical incisions.
- Abrasions, skin tears, blisters.
- Skin graft donor sites.
- Superficial partial thickness burns.
- Stage I or II pressure ulcers.
- Autolytic debridement facilitated by the moist wound healing environment.
- Post tattoo application and removal.

Foam Dressing

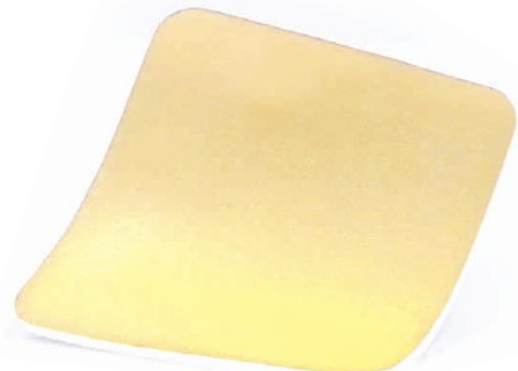

Product advantages

- Unique multi-layer design provides high absorbency with high breathability to reduce the risk of maceration .
 - Adapts to changing levels of exudate to maintain moisture balance for optimal wound healing .
 - Demonstrates high fluid handling capacity under compression .
 - Dressing does not stick to wound bed thereby minimizing disruption of healing tissue.
 - Film backing prevents strikethrough and protects against external bacteria and viruses*
- *In vitro testing shows that the transparent film provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage .

Suggested Applications:

- Pressure, arterial, neuropathic (diabetic) and venous leg ulcers, including use under compression wraps .
- Skin tears and abrasions.
- Donor sites .
- Superficial partial thickness burns.

Hydrocolloid Dressing

Product advantages

- May be used as a protective dressing on at-risk skin. May be used on intact skin to protect from friction
- Proven up to 7 day wear time
- Smooth outer surface helps reduce the risk of shear and friction
- Absorbs exudate without breaking down or leaving residue in the wound
- Film border eliminates the need for tape and makes dressing application easier
- Water-resistant film border adheres firmly
- Film border seals to help prevent premature dressing failure due to edge lift
 - Protects the wound and periwound skin from contaminants, body fluids, bacteria and viruses* *In vitro testing shows that the transparent film provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage

Suggested Applications:

- Partial thickness dermal ulcers
- Superficial wounds and abrasions
- Superficial and partial-thickness burns
- Donor sites

Silver wound dressing

Product advantages

- Ag⁺ can combines the sulfhydryl on the apoenzyme of bacterial, and the apoenzyme will be inactivated and bacterial be killed.
- Ag⁺ increases the release of Ca⁺, Zn⁺ and Cu⁺, which enhances the wound healing.
- It can keep outside the bacterial and control bacteria infection.
- High absorption wound pad and do not stick to wound.

Suggested Applications:

- All kinds of infective stage and inflammation stage for wound in high exudation.
- vena cava ulcer of lower limb.
- ii-iv stage bedsore.
- epithelial layer wound.
- abrasion.

Alginate wound dressing

Product advantages

- Easy to use, good air permeability, excellent biocompatibility. Can be absorbed by human body. Not to adhere to the wound.
- Accelerate the healing by making the wound smaller. Not cause infection of the wound around.
- It can be biological degraded , and protect the environment.
- It is soft and can be filled in the wound. Enhance the growth of cavity.
- Accelerate various absorbent exudates. Form the gel to protect the wound and skin around.
- The exchange of calcium ion and sodium ion will has hemostasis function.
- Remove without pain. It won't cause damage again.
- It has the ability to protect bacterial from the wound

Suggested Applications:

- For surgical and infected wound protection.
- For wound with high volumes of exudate.
- For chronic wounds like ulcers, bedsores and diabete ulcer.

Surgical tape

Product advantages

- Breathable to maintain skin integrity
- Easy, straight, bi-directional tear allows clinician to tailor the tape for various dressing and devices
- Easy to handle with gloves
- Good adhesion to skin and tubing
- Transparent, porous
- Hypoallergenic and latex free
- Water-resistant
- Allows clinician to tailor the tape for the various dressings and devices

Suggested Applications:

- Securing tubing and devices(e.g., catheters, IV tubing)
- Anchoring bulky dressings
- When tape width must be customized
- Taping fragile, at-risk skin
- When repeated taping is needed

Microporous Surgical tape

Product advantages

- Conformable and highly breathable.
- Hypoallergenic and latex free.
- Easy-tear perforated rolls.
- High ventilation due to natural essence of non-woven cloth, do not stop skin basic function breathe&sweating.
- Low irritability by using state of art technology to manufacture tapes. And harmless to human skin of body.
- Powerful adhesion for wrapping and fixing of medical treatment. Suitable to any healing conditions and body position.

Suggested Applications:

- Securing small to medium dressings, especially on damp skin
- Securing lightweight tubing
- Securing ostomy appliances
- Aping fragile, at-risk skin
- When repeated taping is needed

Silk Cloth Surgical tape

Product advantages

- Strong adhesive property, fixing firmly, strong suitability and convenient to apply.
- Hypoallergenic coating with medical hot-melt glue.
- With low sensitization, excellent compliance, no residue glue.
- Low irritation to skin and good air permeability.
- Easy-to-tear, making usage very convenient and comfortable.
- Soft, breathable, comfortable to feel and makes no harm to the skin.
- Moisture and sweat can be drained out easily.

Suggested Applications:

- Protecting wounds from external moisture, fluids or contaminants
- Enhancing penetration of topical medications
- Compressing bandage to help control swelling and stop bleeding
- For dermatological patch testing
- Fixation of needles, probes, catheters and medical equipment

Adhesive wound dressing tap

Product advantages

- Be Breathable and comfortable
- Low allergenic and hypoallergenic adhesive
- Nontoxic, Latex free, low allergenic, nonirritant and nonallergenic
- Sticky is stable and friendly
- Protect the muscle, easy to tear
- No remains on the skin
- Strong permeable, the skin can breathe naturally and decrease the possibility of infection

Suggested Applications:

- Supporting bandages for strain and spains
- Fixing bandage for splints, monitors and lvs
- Used for wrapping the wound, fixing the dressing
- Pressure bandage to promote circulation and healing Industrail First Aid Bandage

Sport tape

Kinesiology tape

Product advantages

- Latex free acrylic adhesive used on our tape allows it to adhere safely and comfortably to the skin. As it is heat-activated, the tape attaches itself firmly to the skin even during vigorous activities.
- The cotton fabric allows moisture to evaporate through the material.
- The tape thickness is manufactured to approximate the thickness of the skin's epidermis.
- This allows athletes to move and feel in a natural manner.
- Water resistant: acrylic adhesive stays firmly attached to the skin even in wet conditions.

Suggested Applications:

- Pain- Reduces pain by taking pressure off the pain receptors
- Lymphatic- Eliminates lymphatic fluid (swelling) under the skin
- Joint- Adjusts mis-alignment to aid skin and muscle function
- Muscle- Supports and strengthens the muscle

Specifications

4 way stretch tape

Product advantages

- Latex free acrylic adhesive used on our tape allows it to adhere safely and comfortably to the skin. As it is heat-activated, the tape attaches itself firmly to the skin even during vigorous activities.
- The tape thickness is manufactured to approximate the thickness of the skin's epidermis.
- This allows athletes to move and feel in a natural manner.
- Water resistant: acrylic adhesive stays firmly attached to the skin even in wet conditions.
- The nylon material contains higher elasticity, softer performance, alleviates pain and prevents muscle injury in the intense sports by microscopically lifting the skin.

Suggested Applications:

- Pain- Reduces pain by taking pressure off the pain receptors
- Lymphatic- Eliminates lymphatic fluid (swelling) under the skin
- Joint- Adjusts mis-alignment to aid skin and muscle function
- Muscle- Supports and strengthens the muscle

Specifications

Pre-cut tape

Product advantages

- Latex free acrylic adhesive used on our tape allows it to adhere safely and comfortably to the skin. As it is heat-activated, the tape attaches itself firmly to the skin even during vigorous activities.
- The tape thickness is manufactured to approximate the thickness of the skin's epidermis.
- This allows athletes to move and feel in a natural manner.
- Water resistant: acrylic adhesive stays firmly attached to the skin even in wet conditions.
- More convenient to use.
- The basic fabric for the pre-cut tape can be cotton or rayon.

Suggested Applications:

- Pain- Reduces pain by taking pressure off the pain receptors
- Lymphatic- Eliminates lymphatic fluid (swelling) under the skin
- Joint- Adjusts mis-alignment to aid skin and muscle function
- Muscle- Supports and strengthens the muscle

Specifications

Rayon tape

Product advantages

- Latex free acrylic adhesive used on our tape allows it to adhere safely and comfortably to the skin. As it is heat-activated, the tape attaches itself firmly to the skin even during vigorous activities.
- The tape thickness is manufactured to approximate the thickness of the skin's epidermis.
- This allows athletes to move and feel in a natural manner.
- Water resistant: acrylic adhesive stays firmly attached to the skin even in wet conditions.
- Striking color, high elasticity, good permeability. This kind of tape is more popular with people who like to be trendy.

Suggested Applications:

- Pain- Reduces pain by taking pressure off the pain receptors
- Lymphatic- Eliminates lymphatic fluid (swelling) under the skin
- Joint- Adjusts mis-alignment to aid skin and muscle function

Zinc oxide tape

Product advantages

- High-quality rayon cloth for maximum support
- Air permeability allows for evaporation of sweat
- Maintaining strength and stability
- Pinked edges provide quicker tape application whilst eliminating threading
- Good adhesiveness and low irritation
- Tears easily by hands

Suggested Applications:

- To add support restrict range to motion in the muscles and joints of players
- To assist in the prevention or healing of sport-related injuries
- For sensitive skin or frequent taping apply under-wrap first before taping

foam underwrap

Product advantages

- high quality elastic PU(Polyurethane) foam substrate
- Super light weight, very Soft, comfortable, porous and breathable, absorbed flexible
- Good tensile strength
- Heat preservation
- Adhesive no adhesive or latex cohesive. or hot melt
Prevent allergies
- Adheres to itself, non-sticky to hair or skin no pins or clips needed
- Protects primary dressings
- Water resistant, will not loose by sweat or water
- Easy tear

Suggested Applications:

- Can be used to secure cold packs and bandages
- Depending on personal preference. Foam underwrap can be applied before athletic tape, Zinc Oxide or EAB or any tape to help eliminate skin irritation and chafing
- Hold pads and socks in place and as a protective wrap inside riding boots, skiboots and other athletic footy
- Keeps hair in place like a scrunchie or headband to keep it out of eyes
- Support wraps for horses and pets
- Used as finish line of the 100-yard dash
